Applicants' Response filed January 17, 2011 is acknowledged. Claims 1-9, 15, 30, 33 and 39 remain under consideration.

The objection and rejection set forth in the previous Office Action are withdrawn. The following objection and rejection constitute the only objection and rejection presently applied to the instant claims.

A Terminal Disclaimer filed January 17, 2011 is further acknowledged and has been accepted.

The disclosure is objected to for the following informalities:

The acronyms "4-APAA" and "5-ASA" should be spelled out at their first occurrence in a claim.

Appropriate correction is required.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thornton*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-9, 15, 30, 33 and 39 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 6-17, 19-23 and 39-58 of U.S. Patent No. 6,458,776. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the patent are drawn to methods of treating inflammatory conditions of the gastrointestinal tract comprising administering a pharmaceutical composition comprising 4-APAA compounds and 5-ASA compounds.

No claim is allowed.
